Fnu Tushar

Malvern, PA | (484) 716-7840 | fnu.tushar@outlook.com | Linkedin | Github | Portfolio

Professional Summary

Data scientist building ML pipelines and LLM-based systems, with 5+ years as a data consultant (SQL, Python, Databricks) at Oracle and Accenture. MS in Data Analytics, Penn State (Dec 2026); seeking full-time Data Scientist / Applied ML roles.

Technical Skills

Programming: Python (Pandas, NumPy, Statsmodels, Scikit-learn, PyTorch, TensorFlow, Matplotlib, Plotly), SQL, R, Java.
Machine Learning & Statistical Techniques: EDA, Regression, Classification, Clustering, NLP, Time Series Forecasting, Feature Engineering, Model Evaluation(Accuracy, Precision, Recall, F1, AUC-ROC), Model Explainability (SHAP).
AI-Assisted Development: VS Code, Claude Code, Prompt Engineering, LLM Integration(Claude API, Knowledge Graphs).
Data & Cloud Tools: Star-Schema Data Modeling (Bronze/Silver/Gold), Data Validation(Pandera), Data Warehousing(Fact and Dimension tables), AWS (Lambda, S3, ECR, CloudWatch, IAM, CloudFormation), Databricks, PySpark, Tableau, Power BI.
MLOps: FastAPI, Docker, CI/CD(GitHub Actions), MLflow(Tracking & Registry), Orchestration(Dagster), Pytest.

Work Experience

Barton Malow May 2026 – Aug 2026
Intern - Data Scientist *Michigan, United States*

- **Developed a linear regression model** in Databricks AutoML on engineered billing features, forecasting $53K–$57K in annual platform spend and flagging $11.6K of idle compute cost.
- **Automated a cost-attribution pipeline** that pulls Claude query durations from Databricks system logs, showing AI's share of serverless SQL warehouse spend grew 5.5x (1.5% to 8.3%).
- **Architected a 211-rule data quality engine** over 23 gold Delta tables to catch raw-pipeline anomalies, giving 100% repeatable results, with AI-based profiling to generate new rules.

Pennsylvania State University Sep 2025 – May 2026
Research Assistant - Data Science *Pennsylvania, United States*

- **Modeled a context-aware semantic retrieval framework** using PyTorch to automate Research Assistant candidate selection, optimizing dense vector pairs across 15 technical domains to secure a 122% semantic alignment gain.
- **Implemented an AI governance platform for MyRaina Inc.** integrating a deterministic classification engine with a local Llama 3 explanation layer, auditing 14-field logs against 5 CMS/NIST federal rules to deliver 100% private risk scoring.

Oracle Corporation Feb 2022 – Dec 2024
Staff Data Consultant *Bangalore, India*

- **Designed outlier detection logic** for 600K+ subscriber billing pipelines, ensuring 98%+ data integrity within SLAs.
- **Automated churn and usage KPI dashboards**, hitting a 99% on-time delivery rate for leadership.
- **Led a 15-member cross-functional testing initiative**, coordinating with offshore analytics engineering teams to deliver data-backed readiness dashboards that secured a 100% on-time production launch.

Accenture Solutions Pvt Ltd Jun 2019 – Feb 2022
Data Consultant *Pune, India*

- **Improved billing accuracy for 4.5M customers** by resolving 50+ recurring data quality issues in production database.
- **Streamlined batch bill-run workflows** reducing execution runtime from 24 to 2 hours and manual effort by 92%.
- **Expanded SQL validations in production,** executing row-level statistical checks, cutting data discrepancies by 60%.

Education

Pennsylvania State University Pennsylvania, United States
Master of Data Analytics, GPA: 3.96/4 *Aug 2025 – Dec 2026*
Statistical Analysis, Data-Driven Decision Making, Predictive Analytics, Deep Learning, Natural Language Processing, AI Ethics.

KIIT University Odisha, India
Bachelor of Technology in Electronics and Instrumentation Engineering, GPA: 3.3/4 *May 2015 – May 2019*
Control Systems, Digital Electronics, Object-Oriented Programming, Data Structures & Algorithms, Artificial Intelligence.

Projects

Osteoarthritis Market Visits Share Forecasting Pipeline Live Demo | GitHub
End-to-end ML system that predicts how often doctors choose a knee injection (Zilretta) over rivals, and how far to trust each forecast, with 7M+ visits, Dockerized pipeline, FastAPI on AWS Lambda, MLflow, and a Claude question box over a market knowledge graph.

- **Built a Docker pipeline** that loads 72 months of IQVIA data into a star-schema warehouse (4 dimensions, 2 facts, 149K rows) with 11 quality checks, then publishes to S3 for the FastAPI service.
- **Engineered 7 leakage-tested feature groups** and evaluated 3 models, including a decline-alert classifier, with walk-forward tests and SHAP (+0.44% log-loss, 46/46 months); tracked in MLflow, run by Dagster, gated by Pytest CI.
- **Deployed a FastAPI service on AWS Lambda** (14 endpoints, S3 releases, GitHub Actions) and an AI chat box over a 311-node knowledge graph, giving a brand manager sourced answers.

Worldwide Sentiment Analysis of LLM-Related Tweets GitHub
Early-warning view of where public trust in LLMs is turning negative, by region and over time, from 305K tweets using NLP scoring, geographic cleanup and time-series forecasting.

- **Normalized 305K tweets** via aliases, bio inference, and geocoding; cut Other/Unknown locations from 72.8% to 43.9%.
- **Built a sentiment pipeline**: VADER scoring, ridge regression on log-likes and a SARIMAX forecast with weekly seasonality.
- **Delivered an AI-policy brief**: South America fell fastest (0.249 to 0.197); Bard/Gemini scored lowest (0.12–0.14).
